PROFESSIONAL SUMMARY

Android Developer with 3+ years of experience delivering enterprise and government-grade Android applications using Kotlin, Jetpack Compose, and MVVM/Clean Architecture. Experience with platforms serving Qatar and Oman government agencies. Builds offline-first, API-integrated mobile solutions with secure authentication, document workflows, and Arabic RTL / English localization.

TECHNICAL SKILLS

Languages: Kotlin, Java

Android: Jetpack Compose, XML, ViewModel, Navigation, LiveData, Data Binding

Architecture: MVVM, Clean Architecture

Networking: Retrofit, Ktor, REST APIs

Persistence: Room, DataStore, SharedPreferences

Async: Coroutines, Flow, WorkManager

Tools: Android Studio, Git, GitHub Actions, Firebase

PROFESSIONAL EXPERIENCE

Android Developer — Informatique

July 2024 – Present | Full-time | Cairo, Egypt

- Develop and maintain production Android applications in Kotlin and Jetpack Compose for enterprise and government clients.
- Apply MVVM and Clean Architecture to keep large codebases stable and maintainable across release cycles.
- Integrate RESTful APIs with secure token-based authentication, handling complex data flows for multi-role systems.
- Build offline-first features using Room and WorkManager for unreliable network conditions.
- Collaborate with product owners, backend engineers, and QA to define requirements and deliver on schedule.
- Work with Arabic RTL and English localization, document uploads, and multi-step government workflows.

Electronic Meetings Platform — Qatar General Secretariat

- Built features for meeting management, attendance tracking, agenda handling, and secure document sharing.
- Improved data flows and Jetpack Compose state handling for smoother UI.
- Delivered offline caching and background sync for uninterrupted access during connectivity drops.

MTC Platform — Ministry of Transport & Communications, Oman

- Contributed to Android apps serving digital government services for citizens and transport professionals.
- Built reusable ViewModels and modular UI components for faster feature development.
- Integrated APIs for licences, forms, and service requests with validation and error handling.

PERSONAL PROJECTS

Attendance System

Kotlin • Jetpack Compose • MVVM • Room • WorkManager • REST API

- Full attendance management app with Room caching and background sync via WorkManager.
- Responsive Jetpack Compose UI supporting portrait and landscape.

Best-Food Recipe App

Kotlin • MVVM • Retrofit • Room • Jetpack Compose

- Recipe discovery app with search, category filters, local favourites, and offline read mode.

EDUCATION

B.Sc. in Computer Engineering

Modern Academy Maadi, Cairo, Egypt
